

## The future generation of LED lights is now on the market!

Peli Products presents a new generation of torches, some of the most technically advanced on the market today: **StealthLite™ (2410)**, **SabreLite™ (2010)**, **Little Ed™ (3610)** and **Heads Up Lite™ (2680)**. All of these new torches feature Peli's cutting-edge **Recoil LED Technology™** and with this, the bar for 1-Watt LED lights has been significantly raised.

What differentiates LED Recoil Technology torches from others on the market are their ability to create extraordinary focused beams of light, previously unobtainable in LED torches. The key to this outstanding development is a design that directs all of the 1 Watt Luxeon LED light back into the reflector to focus the light into a truly impressive beam of pure white light. When comparing its output to existing multi-LED lights, Recoil Technology generates a beam 33 times brighter. Another great benefit of this new generation of torches is that lamp modules never need replacement.

### 2010, SabreLite™ Recoil™ LED

---

With an impressive output of 32 lumens, this classic torch now comes with 50 hours of battery burn time and 10.000 hours of LED life. Certified to ATEX Category 3 (Zone 2) and submersible up to 150 meters, it is built of extremely tough and chemically resistant Xenoy® polymer, which makes this new torch unbelievably strong.

### 2410, StealthLite™ Recoil™ LED

---

Our most famous work light is now available with a pre-focused, bright LED beam of 32 lumens and battery burn-time of 32 hours. Its strong body features a convenient side-mounted switch for one-hand operation. It is certified to ATEX Category 3 (Zone 2), submersible up to 150 meters, and can be mounted to a variety of work helmets with our versatile bracket kits.

### 2680, HeadsUP Lite™ Recoil™ LED

---

The 2680 blends the dependable Peli 150 meters submersible design with cutting-edge Recoil LED Technology™. It offers a bright light of 33 lumens, 33 hours of battery burn-time, and 10.000 hours of LED life. With an ABS resin body and polycarbonate lens, this headlamp will perform perfectly under extreme weather conditions. It comes with both rubber and cloth straps that can be adapted to a head or helmet. ATEX certifications pending.

### 3610, Little Ed™ Recoil™ LED

---

The most popular lightweight, right angle torch for emergency/firefighters now offers an output of 32 lumens, even brighter than before, an incredibly long battery burn-time of 32 hours, and 10.000 hours of LED life. This ATEX Category 3 (Zone 2) approved torch is water resistant and built of nearly indestructible ABS resin with a polycarbonate lens. It features an ergonomic switch that allows easy operation even with gloves on.

As always, these new torches are covered under Peli's Unconditional Guarantee. **You break it, we replace it ... forever™**
