## ZS2100/3, ZS2095/3, ZS2083/3 & ZS2100/3H, ZS2095/3H, ZS2083/3H The rescue and portables three-person ladders from aluminum.

Relax. It's a Makros. Working at height has several risks. Choosing Makros is choosing safety, quality and durability. Makros access equipment meets and exceeds the latest European safety standards.

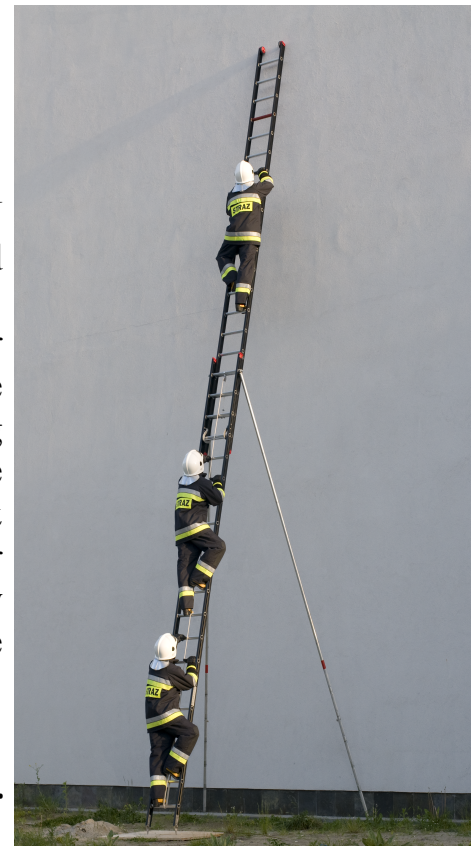

Our ladders have Certificates of Accordance with PN-EN 1147 written by The Józef Tuliszkowski Scientific and Research Centre for Fire Protection. (\*does not have)

The parts of the extension ladders are sliding into each other profiles, therefore creating a very strong construction. The open profile of sliding into each other and the patented rung fixation creates a very light and easy to handle ladder and make it possible to grant a 10 years guarantee for construction & material failures. The black powder coated surface of the ladder make sure that the material remains a good temperature at every moment. That is particularly important in winter, when the temperature can be well below 0°C.

### **ZS 2100/3, ZS 2095/3, ZS 2083/3**

**A 2 part, rope operated aluminium ladder, assigned for three person, included supports legs.**

**ZS 2100/3H, ZS 2095/3H, ZS 2083/3H with extra brake ropes Adjustable every 28 cm**

### Technical data

<u>Type</u>	<u>Rungs</u>	<u>Min (m)</u>	<u>Max (m)</u>	<u>Weight (kg)</u>
ZS 2100/3 	2x20	5,70	10,05	47,9 ( 49 model H)
ZS 2095/3 	2x19	5,40	9,50	43,9 ( 44,7 model H)
ZS 2083/3*	2x18	4,85	8,30	41,0 ( 41,8 model H)
