

HEROS

Fire fighting helmets certified to EN 443:2008

- Highest protection level
- Safety and comfort for every situation

 **rosenbauer**

Rosenbauer Helmet Systems

Rosenbauer has more than 20 years experience with protective helmets. Several hundred thousand HEROS fire helmet systems are already in use around the world, providing fire fighters with optimum head protection.

Rosenbauer now presents the new HEROS-smart fire helmet in addition to the full protection HEROS-xtreme helmet which has been operational since 2005.

In addition to the exemplary high protection level of the HEROS series, this new ¾ shell helmet is characterized by its particularly low weight, good ventilation and high wear comfort.

Both helmet systems HEROS-xtreme and HEROS-smart have been developed for the hardest of operations and surpass the requirements in EN 443:2008.

HEROS-xtreme: Full shell

HEROS-smart: ¾-Shell

HEROS-xtreme

Safety for extreme situations

Based on 20 years of experience with protective helmets, Rosenbauer developed the new fire fighting helmet in accordance with EN 443:2008: HEROS-xtreme

With a considerable number of important details, the new HEROS-xtreme is one of the best fire fighting helmet systems in the world:

- Certified to EN 443:2008 helmet type B/3b
- High impact and penetration resistant helmet shell
- Ergonomic inner lining
- Trapezoidal chinstrap for better stability
- Easily adjustable helmet size from outside
- Face shield and eye protection visor*
- Revolutionary helmet lamp system*

* optional

New developed composite helmet shell

- Unique glass fibre reinforced composite material
- High strength and impact resistance at extreme temperatures
- Tested for structural fire fighting and fire container operations

Shock absorption

Tested and certified

Helmtyp B/3b
EN 443:2008
E2E3C***
C 0158
EN 14458 (Visors)

After flame engulfment (approx. 1,000 °C, 10 seconds):

- No structural damages
- Full protection
- No damage of the inner lining
- No afterburn > 5 sec.
- Test head temperature only 35 °C!

Flame engulfment

■ Two visors for every operation*

Both visors are also suitable for wearers of spectacles

Extensive facial protection

Visors tested and certified as to EN 14458:2004.

The following optional requirements are satisfied by both visors

2-1.2	UV protection level
-30 °C +120 °C	Applied extreme temperatures
T	Penetration resistance at extreme temperatures (120 m/sec.)
K	Anti-scratch
N	Anti fog
Ω	Electrical isolation

*Separate, swivel eye protection visor***

Size adjustment from the outside

- Easily adjustable helmet size (51 - 65 cm)
- Size adjustable ratchet headband for excellent wearing comfort
- Adjustment possible from the outside even when wearing gloves

* optional

** not available in France

Internal features

- High-comfort padding for the prevention of pressure points even during longer operations
- Best possible hearing and heat sensitivity in combination with excellent ear protection
- Optimum weight distribution
- Excellent wearer comfort
- Made of NOMEX®/Viscose FR (heat- and flame resistant, sweat absorbent, machine washable with 40 °C)

Trapezoidal chinstrap

- Ergonomic, optimised 3-point chinstrap (100 % NOMEX®, heat and flame resistant)
- Integrated ear protection
- (NOMEX®/Viscose FR (heat and flame resistant, sweat absorbent, machine washable with 40 °C)

Neck protection

- Heat- and flame resistant material
- Also available as all-round protection (model "Holland")

Mask attachment

Suitable for all common breathing masks

Fully integrated helmet lamp*

- Latest LED technology
- Extremely powerful high-tech beam
- Explosion-proof
Ex II 2 G Ex ib IIC T4
- Helmet lamp is easily detachable and can also be used as a hand-lamp

By pressing the HEROS-Button the lamp can be detached easily

Bone conduction communication kit*

Excellent voice transmission even at high noise level

Communication Kit IMPACT-COM

- Microphone and speaker in one housing mounted next to the ear
- Voice is recorded over a bone conduction microphone at the side of the head
- Large PTT switch, which can also be pressed with underarm or elbow
- Communications unit is fastened to the side of the chin strap by velcro fastener
- Communication kit can be changed from one helmet to another

Communication Kit SAVOX

- Microphone directly on the head mounted in the helmet net, speaker mounted next to the ear
- Voice is recorded over a bone conduction microphone at the back of the head
- Different PTT buttons available (please refer to "Options")
- Communication kit integrated in the helmet

* optional
