

VETTER LEAK SEALING PASTE

Vetter Leak Sealing Paste is the Vetter first-aid solution for stopping the smallest leaks of chemical or petrochemical liquids on valve sockets or pipe flanges. The paste is easily applied - to staunch leaks quickly and

effectively - even on rusty, greasy and soiled surfaces, in the most awkward locations. Leak Sealing Paste is an ideal stopgap remedy averting greater damage until leaking pipes are properly repaired.

APPLICATIONS:

A quick sealing solution for small leaks on valve sockets, pipe flanges and drum edges as well as on awkward parts of fittings and pipelines carrying petrochemical products like oil and petrol, hydrocarbons, alkali solutions, acids and detergents

SIZES:

Can containing 500 ml (approx. 600 g)
In cartons of 8 tins

ADVANTAGES:

Quick and easy to apply

Withstands backpressure up to
0.4 bar (5.81 psi)

Also effective on rusty, greasy or
soiled base

Very cost-efficient solution

SAFETY:

Non-poisonous

Non-inflammatory

MATERIAL:

Soft paste, water-soluble
(not suitable for water leaks)

COMPLETE SET:

Set Vetter Leak Sealing Paste

Art.-No. 154 02 100

consisting of:

Carton of 8 tins, each containing
500 ml (approx. 600 g)
