

1000 litre Waste Water Bladder Tank

PPS offers a full range of equipment specifically designed to meet all your decontamination requirements .

Overview:

Professional Protection Systems Limited Supply a range of Bladders to contain the waste and contaminated water from your decontamination unit.

Specially design to be filled from the PPS waste water pump and waste water hose. All couplings that are required are supplied with the unit.

The Bladders are fitted with heavy duty lifting handles, allowing the bag to be moved if required.

Features:

- Excellent rip, tear and Puncture resistance for almost all terrain.
- Come complete with Storz Couplings on both the inlet and outlet.
- Inlet and Outlet fitted with Safety Butterfly Valve
- Over Pressure valve on the top cap allows air to escape and the bag fills.
- Bags can be connected together to give larger capacity.
